per hotel room /yr

Investors Care

European sustainable funds grew assets under management by

EEA Membership:

- Provides members with operational and strategic pathways to a low carbon future
- Enables members to source their energy at low cost and carbon free
- For most members, the cost of membership will be very substantially outweighed by savings on energy bills and an increase in property value
- Members receive a free energy report annually for each property with performance benchmarked against proprietary industry data
- The EEA is also able to provide bespoke data for ESG reports for members to include in their annual reports and other investor information
